The corrected reading of the barometer (reduced to sea level) at New York on Wednesday, July 14, 1929, at 8 AM, as reported by the United States Weather Bureau, was thirty and eleven hundredths (39.11) inches. This closely approximates seven hundred and sixty-four and eight-tenths (764.8) millimetres. Captaing of all vessels now lying to or near the ports of New York and Brooklyncan advantageously use the above official data for observing whether their own barometers require any considerable correction or adjustment.
